EDUCATION

ABES Institute of Technology

2023 – 2027

B.Tech in Computer Science (Artificial Intelligence) — CGPA: 7.7/10

Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming

Sai Millennium Sr. Sec. School

Class XII (CBSE) — 83%

2023

Class X (CBSE) — 94%

2021

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript

Web Technologies: HTML5, CSS3, REST APIs

Databases: SQL, MySQL

AI/ML: YOLOv8, DeepSORT

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, VS Code

PROJECTS

Prahari — The Watchman | YOLOv8, DeepSORT, Flask, SQLite, Groq API, Apple MPS

- Architected a hybrid edge-cloud surveillance system optimized for 8GB-RAM hardware — YOLOv8n detection on Apple MPS GPU, DeepSORT tracking on CPU, LLM reasoning offloaded to the cloud.
- Engineered persistent multi-object tracking with unique IDs sustained across frames using Ultralytics' native tracking pipeline.
- Designed dual anomaly-detection logic — temporal loitering detection and spatial unattended-object detection via Euclidean-distance thresholds — to auto-flag security events.
- Built a natural-language query layer over surveillance logs by pairing Flask with the Groq API (gemma2-9b-it), turning raw event logs into plain-English answers.

Recall — AI-Powered Meeting Intelligence Platform | WebRTC, Socket.io, Node.js, Express, Firebase, Web Speech API

- Built a peer-to-peer video conferencing platform using WebRTC for media streaming and Socket.io purely for signaling (SDP offer/answer, ICE exchange), enabling low-latency calls.
- Automated meeting documentation by integrating live Web Speech API transcription with AI-generated summaries, removing the need for manual note-taking.
- Implemented Firebase Authentication and a persistent meeting-history dashboard, backed by REST APIs for user and meeting management via Node.js and Express.

Smart People Counter | Python, YOLOv8, DeepSORT

- Built a real-time computer vision pipeline (YOLOv8 + DeepSORT) to detect, track, and count people across live video feeds.
- Logged structured detection data to CSV for downstream analysis and reporting.

EXPERIENCE

UI/UX Design Intern — IndiBus Pvt. Ltd.

May 2024 – Sept 2024

- Translated UI designs into functional, responsive web interfaces in close collaboration with the development team.
- Conducted user research and usability testing that directly informed workflow and interface improvements.
- Designed wireframes and prototypes for web and mobile platforms across the full product development lifecycle.

ACHIEVEMENTS

- Solved 150+ Data Structures & Algorithms problems on CodeChef.
- Built 3+ AI, computer vision, and full-stack projects spanning edge-optimized surveillance, real-time communication, and intelligent automation.
- Strong interest in Software Engineering, Systems Design, and Intelligent Systems.
